

Kyrian Okeke

UI/UX DESIGNER • WEB DEVELOPER • AI TRAINER

kyr17n@gmail.com • +44 7367 214691 • linkedin.com/in/kyrianokeke • github.com/Kyr17n • personal-website.kyr17n.workers.dev

Versatile UI/UX designer and web developer with over 5 years of experience designing and building user-facing digital products. Combines a sharp, user-centric design mindset with hands-on front-end development and work as an AI trainer — evaluating model outputs, writing prompts, and helping shape how AI systems reason and respond. Proven track record of aligning design and engineering execution with business goals, now extending that rigor into AI training workflows.

SKILLS

Design & Development

- Visual Design & Coding
- User Interface (UI) Design
- User Experience (UX) Design
- Front-End Web Development
- Prototyping & Interaction Design
- Design Systems (Figma, Sketch, Adobe XD)

AI Training

- AI model training — prompt writing and response evaluation
- Reinforcement learning from human feedback (RLHF) workflows
- LLM output review, grading, and quality assurance

EXPERIENCE

UI/UX Designer

2021 — Present

Zephyr Digital

- Collaborated with product managers, developers, and designers to create visually compelling, user-friendly interfaces for web and mobile applications.
- Led user research and usability testing sessions to inform design decisions and validate prototypes before development.
- Produced wireframes, high-fidelity mockups, and interactive prototypes using Figma and Sketch, ensuring pixel-perfect implementation by engineering teams.
- Maintained design consistency across products by championing a shared design system and brand guidelines.

Freelance Web Developer

2019 — 2021

Freelance

- Designed and built responsive, accessible websites for clients across multiple industries, from brief to launch.
- Wrote clean, maintainable HTML, CSS, and JavaScript codebases, with a focus on performance and cross-browser compatibility.
- Conducted thorough testing and debugging cycles to eliminate bugs and improve page speed scores.
- Managed client relationships directly — gathering requirements, setting timelines, and delivering projects on schedule.

SELECTED PROJECTS

Shaz's School of Motoring

Website Design & Development

Fully responsive business website for a Wolverhampton driving instructor, built from scratch with a WhatsApp-first booking flow and a 92/100 mobile PageSpeed score.

SendIT App

App Design

End-to-end product design for a mobile money remittance app, built for sending money home to Africa with full fee transparency and speed.

Oldfashioned App

App Design

A vintage clothing discovery and resale app with a rich, editorial aesthetic — pairing warm typography with immersive photography.

ComXo Rebrand

Website Design

Full brand and website redesign for a B2B communications platform, modernising their visual identity and digital presence.

Vault App

App Design

A personal finance and savings app designed around building healthy money habits, with a calm, trustworthy visual language.
